

## mini-Ligno E/D Moisture Meter

### Description:

The mini-Ligno E/D is a pin meter for measuring softwoods, hardwood and panel products. With a wide moisture range 6-45%: Low enough for woodworking, cabinet making or hardwood floor applications. High enough for lumber drying, wood turning, checking pallets and firewood. Built-to-last for all uses from woodworking hobbyists to industrial applications.

The mini-Ligno E/D delivers consistently accurate measurements for the life-time of the meter. The calibration is internally checked before each measurement and if necessary automatically adjusted. Quality, accuracy, reliability are the trademarks for Lignomat's pin meters. The meters do not "fall" out of calibration and never need to be recalibrated.

**A favorite moisture meter** for its quality, performance and price. In an independent review done by the Handyman Magazine the mini-Ligno E/D received a "seal of approval" for being well made, accurate and easy to use.

When measuring thick lumber, make a fresh cut and measure the end grain. If cutting the wood is not feasible, consider buying the mini-Ligno MD/C or the S/DC or DX/C and add the slide-hammer electrode E12 or in-kiln cables.

### Features:

- Measuring range for wood 6-45%.
- Corrections for softwood, hardwood and panel products
- Shock-proof, light-emitting, bright LED display, easy to read in poorly lit areas.
- Stable calibration, not affected by ambient temperatures
- With built-in automatic calibration check
- Measuring Depth 3/16" and 7/16" (5mm, 10mm)
- Ergonomic design for easy operation, durable and rugged design, built to last.
- Automatic shut off.
- The mini-Ligno E/D has a 2-year warranty, display has a life-time warranty, accessories have a 1-year warranty, pins and battery are excluded.

### Specifications:

Size: 5.5"L X 2.75"W X 1"H

Measuring Range for Wood: 6-25%,

Settings: 2 wood groups for softwoods, hardwoods and panel products

Digital LED display: 0.1% resolution up to 10%, 1% steps over 10%

LED display: Virtually unbreakable, life-time warranty.

Calibrated for a wood temp of 70°F (20°C)

A correction table for different wood temperatures is listed in the manual.

### Included:

1 mini-Ligno MD/C meter with wrist strap in carrying pouch with belt loop

1 9V battery

1 laminated wood group card and 1 instruction manual

2 pairs of pins: 1 pair of 3/16" and 1 pair of 7/16" measuring depth (5mm, 10mm)

Built-in connector for an assortment of external electrodes and remote cables

Specifications are subject to change without notice.

Quality, performance and price have made mini-Lignos one of our most popular moisture meters.

The mini-Ligno E/D is the meter for your next woodworking project to make sure the wood is dry enough. No more shrinking or warping.

Smart design – built tough. Green cap serves as handle for easy pin insertion and covers pins for safe transportation. Strap keeps meter in reach.
